1. Executive Summary

EquiServe proposes to develop FUTURA, an internal web-based portal that serves as a prerequisite system for the Equimetrics Portal Performance Appraisal process. FUTURA standardizes Competency Modeling and Individual Development Plans (IDP), ensuring structured skill development, alignment with organizational goals, and seamless appraisal scoring integration.

By requiring completion of FUTURA processes before initiating performance appraisals, the organization ensures competency-based, validated, and traceable appraisal data.

2. Business Objective

- Standardize competency modeling and IDP processes across the organization.
 - Automate approval workflows, notifications, and tracking.
 - Ensure alignment between employee development and performance evaluation.
 - Provide validated, traceable competency data directly into Equimetrics.
-

3. Scope

In-Scope

- Development of FUTURA Portal with two modules:
 - Competency Leveling (CL)
 - Individual Development Plan (IDP)
- Integration with Equimetrics Portal for appraisal prerequisites and score contribution.

 AN EQUICOM GROUP COMPANY	BUSINESS REQUIREMENT DOCUMENT		
	Document code:	Effectivity date:	Revision no.:
Document Name:		Information Classification:	

- Automated notifications, approvals, and competency/IDP tracking.

Out-of-Scope

- Redesign of Equimetrics Portal.
- Non-competency-related HR processes (e.g., payroll, recruitment).

4. Business Requirements

Functional Requirements

- Competency Leveling module:
 - Supervisor inputs competency, weight, level, justification.
 - MPLR field auto-populated from employee position.
 - Workflow approval: **Supervisor -> AM -> M -> Employee -> HR.**
 - Locking of approved competencies and enabling IDP creation.
 - Final score contributes 10% to appraisal rating.
- IDP Module:
 - Supervisor initiates IDP based on identified gaps.
 - Employee details auto-carried forward.
 - Inputs: development activity, competency, target competency level (1 step higher), and type (Education/Experience/Exposure).
 - Conditional validation (e.g., upload training certificate, activity logs).

	Document code:	Effectivity date:	Revision no.:	Page: 5 of 10
Document Name:			Information Classification:	

- Workflow approval: **Supervisor -> AM -> M -> Employee -> HR -> Supervisor -> HR.**
- HR validates and pushes scores (1–5) into Equimetrics.
- Final score contributes 10% to appraisal rating.
- System Features:
 - Automated email notifications at each workflow step.
 - Conditional validations (e.g., only one-level increase allowed).
 - Audit trail for approvals/rejections.
 - HR dashboard for tracking.

Non-Functional Requirements

- Seamless integration with Equimetrics.
 - Secure data storage with auditability.
 - High system availability for all employees and supervisors.
 - Compliance with organizational IT and HR policies.
-

5. Assumptions

- All employees and supervisors have access to FUTURA and Equimetrics.
- Employees must acknowledge competency leveling and IDPs before HR approval.
- Training providers or developmental activities are externally available.

	Document code:	Effectivity date:	Revision no.:	Page: 6 of 10
Document Name:			Information Classification:	

6. Constraints

- IDP limited to maximum 3 competencies per cycle.
- Improvement restricted to one competency level per cycle.
- Certificates/evidence mandatory for validation of completion.
- FUTURA must integrate seamlessly with Equimetrics.

7. Risk

- Employees may resist the additional step before appraisal.
- Possible delays if supervisors or employees do not acknowledge requests promptly.
- Technical integration issues with Equimetrics.
- Dependence on external training providers for education-based IDPs.

8. Success Metrics

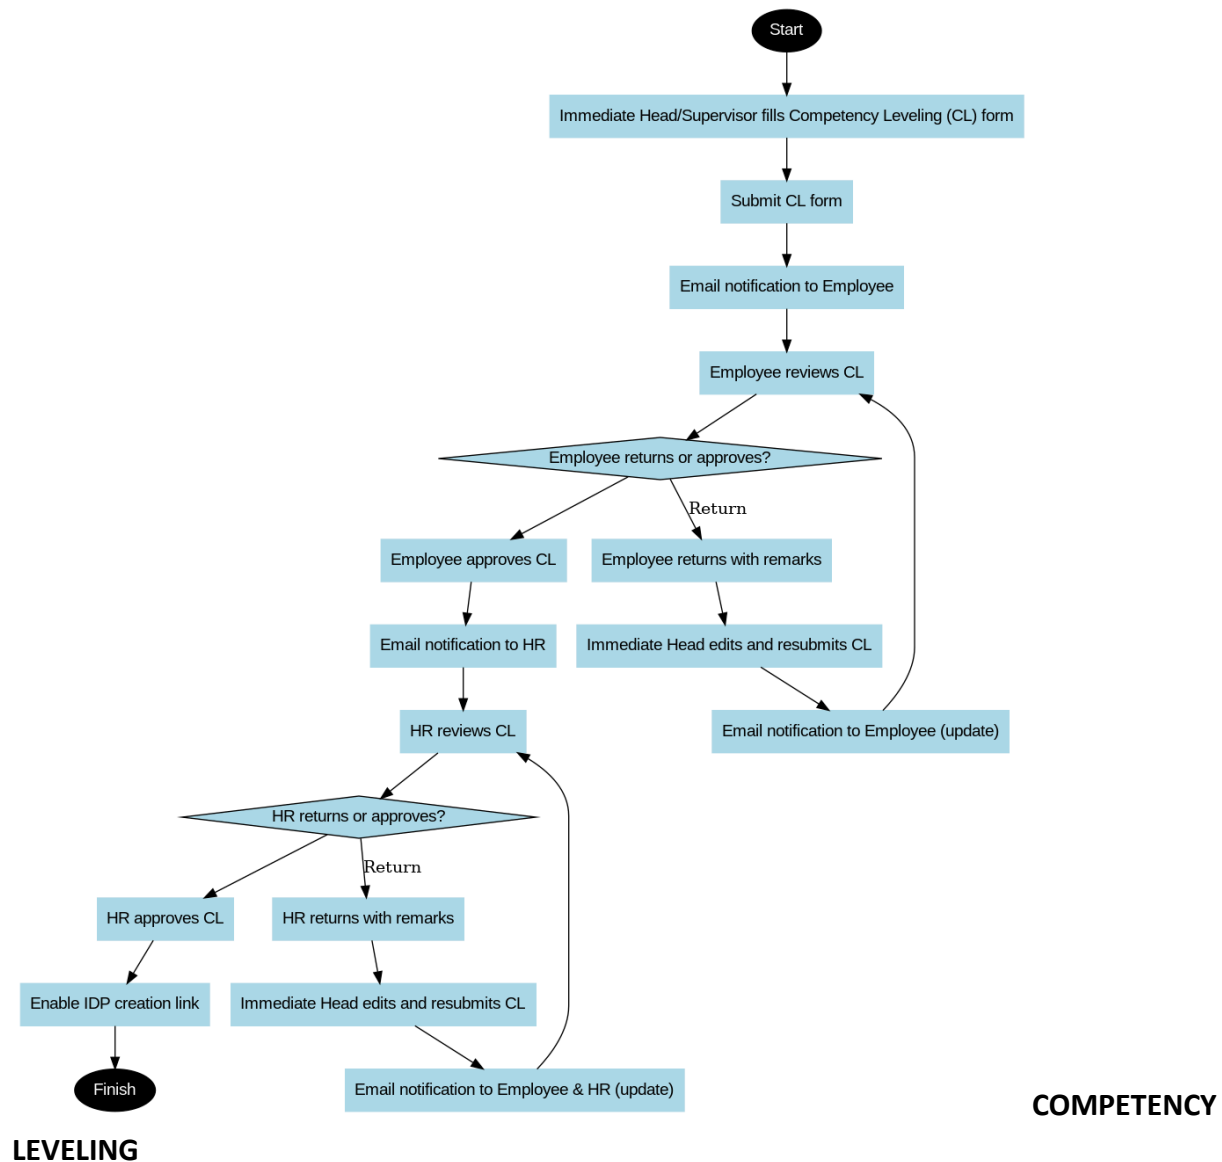

- 100% of appraisals initiated only after FUTURA completion.
- Reduction in manual HR tracking of competencies and IDPs.
- Improved accuracy of competency data for appraisals.
- Increased employee development activity completion rates.
